## TO WHOM IT MAY CONCERN

Fabian Chua joined the **Accenture Apprenticeship Program** from 9 May 2022 till 12 August 2022. He was assigned to a Public Services Sector Company in Singapore, involved in developing a robust Design System that will impact all citizens of Singapore for now and years to come. During his internship, Fabian played a key role. His key assignments included the following:

- Development of robust scalable components that were of a high quality
- Raised Bugs as well as fixing them based on his capacity
- Walked through the components during Show and Tell directly with both client and internal teams
- Act as a design champion to ensure design made it to production

During his time here, Fabian has consistently demonstrated a strong work ethic and commitment to excel. He took on an increased scope of work early on and was a key member in taking Design to production.

The project required Fabian to collaborate with a diverse mix of client + colleagues wherein communication was key. Being highly adaptable, he was able to utilize different communication channels and learned quickly how to structure his content (both in email and presentation) to deliver his message clearly. Even though he was new to client work and Agile methodologies, he was able to quickly adapt to the evolving landscape and wasn't afraid to speak up.

Fabian was also a good team player and received favorable comments from his fellow colleagues which demonstrates trust that he has built. He is a fast learner, showing mastery over new tools that were used to support the project and implemented new technologies.

Overall, Fabian performed his role with passion and dedication. He completed all tasks assigned to him with zest and was even able to take on bigger pieces of work stepping up and delivering results. He proved to be a great asset and to the project and I am sure he will be a great addition to his future employer.

Yours faithfully,

Mr Paul Adams

Senior Manager, Creative Technology Lead
